"The first step is to establish that something is possible; then probability will occur."

Summary

Ph.D @ Hanyang university. 7+ years of experience analyzing in biosignal/data such as electroenchpahlogram (EEG), electromyogram (EMG), electrooculogram (EOG), etc. My research topics include myoelectric control, brain-computer interfacing, and computational neuroscience. Skilled in the application of machine learning or deep learning algorithms using Matlab and Python. I have developed various real-time biosignal-based applications such as 1) facial expression recognition system based on EMG [Click], 2) silent speech recognition system based on EMG, 3) lip shape recognition system based on EMG [Click], 4) Triple blink detection system based on EOG [Click], etc.

Experiences

Bio-Interfaced Translational Nanoengineering Group @ Georgia Tech — *Atlanta, GA, USA*

(Projected) Postdoctoral Researcher Candidate — *(Projected) March 2021 - Jan 2022*

- Prof. Woon-Hong Yeo's Lab [Click]

Computational Neuroengineering Lab @ Hanyang University — *Seoul, S.Korea*

Postdoctoral Researcher — *Sep 2020 - Dec 2020*

- Prof. Chang-Hwan Im's Lab [Click]

Computational Neuroengineering Lab @ Hanyang University — *Seoul, S.Korea*

Postgraduate Researcher — *Sep 2015 - Feb 2016*

- Prof. Chang-Hwan Im's Lab [Click]

Computational Neuroengineering Lab @ Hanyang University — *Seoul, S.Korea*

Undergraduate Researcher — *Mar 2013 - Aug 2013*

- Prof. Chang-Hwan Im's Lab [Click]

Education

Hanyang University — *Seoul, S.Korea*

Ph.D. in Biomedical Engineering, GPA: 98.9/100 — *Mar 2016 - Aug 2020*

- Thesis: Development of Face-Machine Interfaces Using Facial Electromyogram for Interactive Virtual Reality Applications

Hanyang University — *Seoul, S.Korea*

M.S. in Biomedical Engineering, GPA: 98.2/100 — *Sep 2013 - Aug 2015*

- Thesis: Development of a transient visual evoked potential (tVEP)-based brain switch system [Click]

Yonsei University — *Wonju, S.Korea*

B.S. in Biomedical Engineering, GPA: 95/100 — *Mar 2008 - Aug 2013*

- Received four scholarships for excellence in grades in 2009 and 2010 (total four semesters)

Honors & Awards

2019	**Best Paper Award**, 55th Korean Society of Medical & Biological Engineering [Click]	*Incheon, S. Korea*
2019	**Best Poster Paper Award**, 54th Korean Society of Medical & Biological Engineering [Click]	*Yeosu, S. Korea*
2018	**Young Investigator Award**, SMIT2018-IBEC2018 Joint Conference [Click]	*Seoul, S. Korea*
2018	**Young Investigator Travel Award**, SMIT2018-IBEC2018 Joint Conference [Click]	*Seoul, S. Korea*
2016	**Best Poster Award**, International Biomedical Engineering Conference [Click]	*Seoul, S. Korea*
2015	**Excellence Poster Paper Award**, 50th Korean Society of Medical & Biological Engineering [Click]	*Daegu, S. Korea*
2010	**Highest honor (top 1% students for 2010 spring semester)**, Yonsei University	*Wonju, S.Korea*

Projects

Research projects

Recognizing Facial Expressions Based on Facial Electromyogram for Interactive VR Applications

Samsung Science & Technology Foundation @ Samsung Electronics

Participating Researcher

Sep 2017 - Aug 2020

- PI: Prof. Chang-Hwan Im
- develop real-time facial expression recognition system [Click to see the paper] [Click to see the video]

Development of Non-invasive Integrated BCI SW Platform To Control Home Appliance and External Devices By User' s Thought Via AR/VR Interface

Korea Institute of Science and Technology (KIST)

Participating Researcher

Apr 2017 - Dec 2023

- PI: Prof. Chang-Hwan Im
- develop emotion recognition system using facial electromyogram [Click to see the patent]

Development of Multimodal Brain-Machine Inference System Based on User Intent Recognition

Information & Communication Technology Promotion (IITP)

Participating Researcher

May 2013 - Feb 2017

- PI: Prof. Inyoung Kim
- develop EEG indices for predicting user's BCI application suitability [Click to see the paper]

Development of Bio-Signal Analysis Algorithm for Wearable Devices

Samsung Electronics

Participating Researcher

Oct 2016 - Dec 2016

- PI: Prof. Chang-Hwan Im
- develop an eye-gaze direction detection system using electrooculogram
- develop an silent speech recognition system using electromyogram
- contribute C-lab team's spin-off (Linkface)[Click to see the article]

Development of Eye Tracking Source Technology Based on Electrooculogram for HCI Application

National Research Foundation (NRF)

Participating Researcher

May 2015 - Apr 2017

- PI: Prof. Won-Du Chang
- design and conduct experiments for recording electrooculogram signals [Click to see the paper]
- conduct EEG data analysis and abnormal EEG data/pattern classification of epilepsy patients

Development of real-time bio-signal-based cultural content evaluation technology focused on large customers

Korea Institute of Industrial Technology (KITECH)

Participating Researcher

May 2013 - Feb 2016

- PI: Prof. Dong pyo Jang
- develop EEG indices for evaluating cinematics [Click to see the paper] [Click to see the article]

Development of original technologies for brain-computer interface based on the spatiotemporospectral analysis of brain activity patterns

Ministry of Science, ICT and Future Planning

Research Assistant

Oct 2013 - July 2014

- PI: Prof. Won-Du Chang
- develop transient visual evoked potential (tVER)-based brain switch system[click to see the patent]

Personal projects

Personal homepage

Administrator *Sep 2020 -*

- create personal homepage using GitHub page [Click]

Key board-based braille input system for visually impaired *Yonsei University*

Developer *Sep 2010 - Dec 2010*

- visual programming class project (A+) @ Yonsei University.

Skills

Data analysis experiences	Bio-electric signals (EEG/EMG/EOG) · GSR · 3D motion data · Images
Research techniques	Machine learning · Deep learning · Time-frequency signal analysis · Real-time Data Analysis
Programming	Matlab · Python · C++/C
Web/Media	Adobe premiere
